### **DETAILED ACTION**

Receipt is acknowledged of Applicant's amendment filed on January 07, 2002.

Claims 6-11 were added.

Claims 1-11 are presented for examination.

This application has been filed with formal drawing which is approved by the draftsman.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Samsel et al.'465.

With reference to col. 3, lines 11-26, col. 4, lines 29-44, Samsel discloses the claimed invention. Please note that the limitation of high precision water washing process is disclosed in col. 5, lines 20-24.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3723

4. Claims 5 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Samsel et al.'465 in view of Frost et al.'861.

Samsel has been discussed above, but does not disclose a rolling bearing workpiece. Frost discloses a barrel finishing process for rolling bearings. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to include rolling bearing as taught by Frost for the purpose of deburring the rolling bearing without causing scratching of the rolling bearing surface.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cremeans et al.'868, Nozawa'795, and Krawczyk et al.'134 all disclose multiple step barrel finishing method.
